Advancing Sustainability Globally

The current RBA Industry Focus Process Chemical List (IFPCL) and exempted uses, as of June 1, 2021, can be found below:

Focus Chemicals	Exempted Use Cases
1-Bromopropane (CAS #106-94-5)	
Benzene (CAS #71-43-2)	
Dichloromethane (Methylene Chloride) (CAS #75-09-2)	
Methanol (CAS #67-56-1)	
n-Hexane (CAS #110-54-3)	
N-Methyl-Pyrrolidone (NMP) (CAS #872-50-4)	Exempted Conditional Use for photoresist stripping
Tetrachloroethylene (CAS #127-18-4)	
Toluene (CAS #108-88-3)	
Trichloroethylene (CAS #79-01-6)	

For substitution or elimination, concentrations in mixtures must be below GHS cutoff reporting values, which is <0.1% (1000 ppm) – the lowest cutoff value globally for these chemicals.
